
Table of content

| | | |
|-------|---|----|
| 1 | Introduction..... | 1 |
| 1.1 | Motivations and goals..... | 1 |
| 1.2 | Overview of the thesis | 2 |
| 2 | Fundamentals of production logistics and manufacturing control..... | 4 |
| 2.1 | Fundamentals of production logistics | 4 |
| 2.1.1 | Funnel model and throughput diagram | 4 |
| 2.1.2 | Logistic operating curves | 7 |
| 2.1.3 | Logistic key performance indicators and logistic objectives | 11 |
| 2.2 | Fundamentals of manufacturing control..... | 15 |
| 2.2.1 | Definition of manufacturing control | 15 |
| 2.2.2 | Classification of manufacturing systems | 15 |
| 2.2.3 | Functions of manufacturing control..... | 17 |
| 3 | Literature review | 20 |
| 3.1 | Release control mechanism | 20 |
| 3.1.1 | Classification of release control mechanisms | 21 |
| 3.1.2 | Workload control..... | 25 |
| 3.1.3 | Characteristics of enhanced control systems | 28 |
| 3.1.4 | Summary | 29 |
| 3.2 | Manufacturing system structures: state-of-the-art | 30 |
| 3.2.1 | Classification of manufacturing system structures | 30 |
| 3.2.2 | Hierarchical manufacturing systems | 31 |
| 3.2.3 | Heterarchical manufacturing systems | 32 |
| 3.2.4 | Hybrid manufacturing systems..... | 35 |
| 3.2.5 | Summary | 37 |
| 3.3 | Bottleneck-oriented control methods | 38 |
| 3.3.1 | Definition and classification of bottlenecks..... | 38 |
| 3.3.2 | Theory of Constraints and Drum Buffer Rope..... | 40 |
| 3.3.3 | Bottleneck-oriented control approaches in logistics..... | 44 |
| 3.3.4 | Summary | 46 |
| 4 | Methodology | 48 |
| 4.1 | Main concept and simulation model..... | 48 |
| 4.1.1 | Concept overview | 48 |
| 4.1.2 | Case study and simulation model..... | 52 |

| | | |
|-------|---|-----|
| 4.2 | Methods of a basic control platform..... | 55 |
| 4.2.1 | Main concept | 55 |
| 4.2.2 | A feedback WIP control approach | 58 |
| 4.2.3 | A distributed routing control approach | 61 |
| 4.2.4 | An adaptive backlog control approach..... | 63 |
| 4.2.5 | Summary | 64 |
| 4.3 | A dynamic bottleneck-oriented control approach | 65 |
| 4.3.1 | Main concept | 65 |
| 4.3.2 | Dynamic bottlenecks configuration | 67 |
| 4.3.3 | Determining type and size of the buffer | 73 |
| 4.3.4 | Synchronizing production process | 74 |
| 4.3.5 | Summary | 80 |
| 4.4 | Summary | 80 |
| 5 | Control rules and algorithms..... | 81 |
| 5.1 | Control rules and algorithms of basic control platform | 81 |
| 5.1.1 | Deriving ideal minimum WIP of manufacturing system ... | 81 |
| 5.1.2 | Rules and algorithms of hybrid scheduling approach..... | 84 |
| 5.1.3 | Rules and algorithms of adaptive backlog control..... | 86 |
| 5.2 | Modelling of dynamic bottlenecks and applications..... | 87 |
| 5.2.1 | Modelling and visualizing dynamic bottlenecks..... | 87 |
| 5.2.2 | Fundamental application of modelling dynamic bottlenecks | 92 |
| 5.2.3 | Developing and integrating dynamic bottleneck- oriented control algorithms | 97 |
| 5.3 | Summary | 101 |
| 6 | Simulation experiments and validations..... | 102 |
| 6.1 | Primary validations and conclusions | 102 |
| 6.1.1 | Simulation model setting and verification | 102 |
| 6.1.2 | Validation of feedback WIP Control..... | 103 |
| 6.1.3 | Validation of distributed routing control | 104 |
| 6.1.4 | Validation of adaptive backlog control | 106 |
| 6.1.5 | Validation of basic control platform | 107 |
| 6.1.6 | Validation of dynamic bottleneck-oriented manufacturing control | 114 |
| 6.1.7 | Summary | 116 |
| 6.2 | Comparative control systems..... | 116 |
| 6.2.1 | Constant Work-in-Process control | 117 |
| 6.2.2 | Load-oriented order release..... | 119 |

| | | | |
|-----|-------|--|-----|
| | 6.2.3 | Autonomous control with a queue length estimator | 121 |
| | 6.2.4 | Summary | 122 |
| 6.3 | | Comprehensive validations and main conclusions | 123 |
| | 6.3.1 | Validation of basic control platform | 124 |
| | 6.3.2 | Validation of dynamic bottleneck-oriented manufacturing control | 126 |
| | 6.3.3 | Positioning the goal of high utilization | 130 |
| | 6.3.4 | Debate on the scheduling dilemma | 133 |
| 7 | | Main conclusions and future work | 138 |
| | 7.1 | Main contributions | 138 |
| | 7.2 | Shortcomings and recommendations for future work | 139 |
| 8 | | Literature | 142 |
| 9 | | Appendix | 165 |
